Company " - Silicon India, 2015

" Levearing Mobile App Development Services
to Bring Quality and Simplicity in Applications "
- CIO Review, 2014

"Fastest Growing Indian Company Excellence Award 2014" - Commended for outstanding
achievements at the 5th International Achievers Summit on Global Business Opportunities

About The CEO

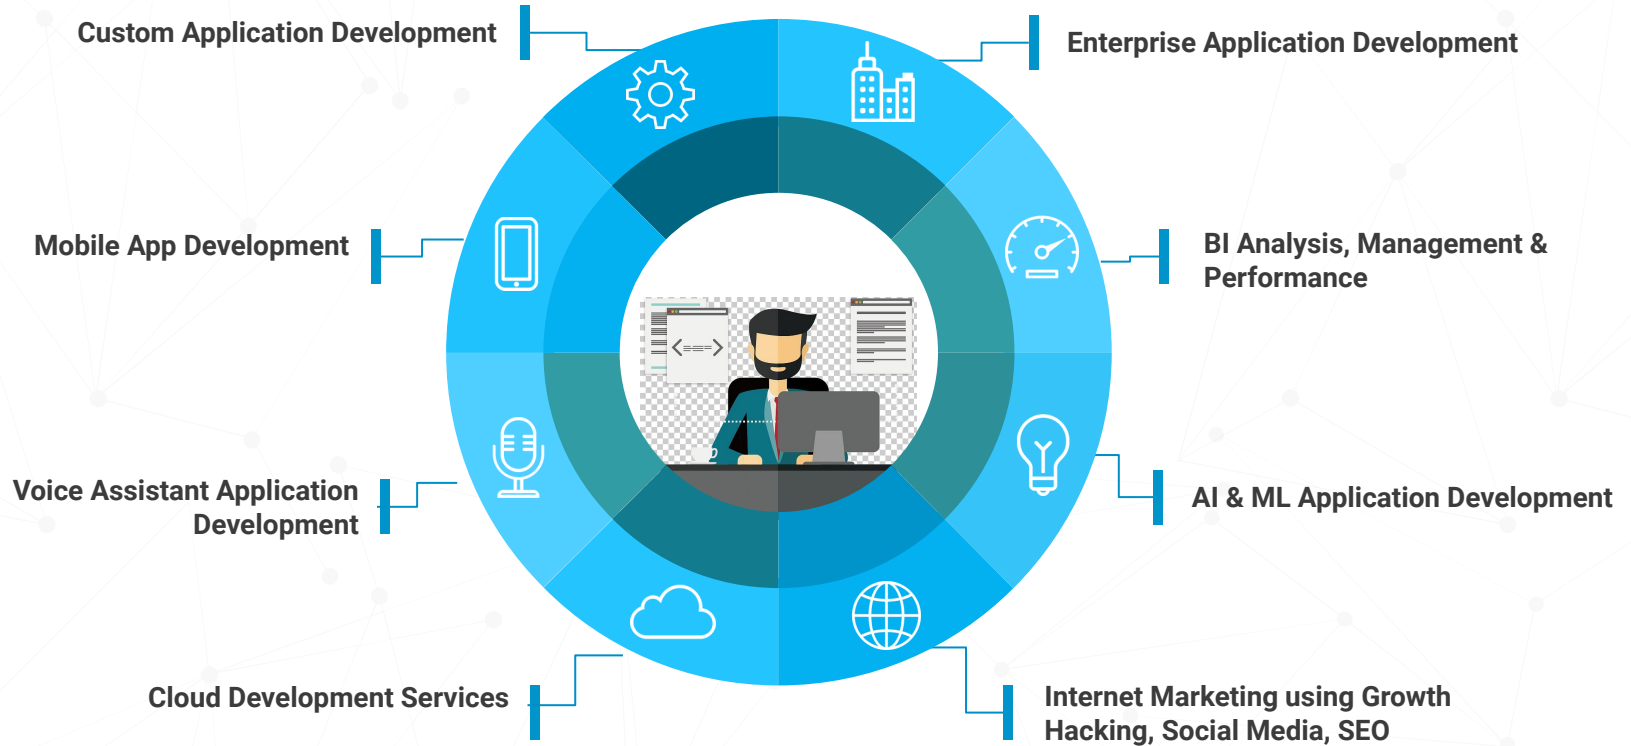

JAYESH BAJAJ

An accomplished engineer by qualification, Jayesh graduated from the University of Southern California, Los Angeles with a Master's degree in Computer Science. He later worked for Qualcomm Inc. in San Diego as a Multimedia Applications engineer. As a part of Qualcomm's team, he worked intensively with leading mobile manufacturers such as Samsung, HTC, Sony, Motorola. He was also part of Google's core team to launch the first Android based phone in 2008.

His strong liking for Web and Mobile, coupled with keen business acumen has him return to India and found Volga Infotech in 2008.

TESTIMONIALS

Thomas Donahue

Founder, Alumni Alliances LLC (Arizona, USA)

“ I just wanted to share a quick note and let you know that you guys did an outstanding job. I'm glad I decided to work with you. It's great how easily Jayesh & his team can convert an Idea into an actual working Prototype, and then scale that into a fully functional Product. Keep it up! ”

Daniel Klaus

Co-Founder, Efurnished.com (California, USA)

“ Our entire experience with Volga Infotech went exceptionally well. Volga Infotech's talented and experienced engineers quickly added value to the team. From their excellent planning skills to their solid engineering, to on-time delivery that was within budget, Volga Infotech performed exceptionally well. Communication between Volga Infotech and Efurnished was painless. Comments about Volga Infotech from engineers on the Efurnished.com side include 'Easy to work with,' 'Responsive,' 'Quick to become subject matter experts,' 'Professional,' 'On time,' 'Great at suggesting improvements,' and 'Well organized.' When it comes to developing sophisticated software, I highly recommend Volga Infotech, and I will be happy to explain Volga Infotech in detail if contacted. ”

Anuj Bhargava

Founder, MyDiabetesHome LLC (Iowa, USA)

“ The technical and management people at Volga Infotech delivered a high-quality solution on time and budget. They are easy to work with and consistently kept us informed of the project status. Volga Infotech shows a significant commitment to customer satisfaction, and it is a pleasure to work with them. ”

TESTIMONIALS

Jim Haden

Co-Founder, Cloudeffective LLC (Oregon, USA)

“ We were at least 6 years behind in our software Technology, and hence launching new feature list was a pain. We were forced to resort to only focus on a freemium model, as customization was out of the picture. But since Jayesh & his team took over the Project, our tech is upgraded, and we can launch new features every month. We can now provide custom features for the clients who are willing to Pay. And we could achieve this thanks to Volga. ”

Anup Marwadi

Founder, Hypertrends Global (California, USA)

“ Volga Infotech has been instrumental in providing us with excellent software resources that we need to deliver mission-critical projects. Over the past year, we have completely phased out our other offshore vendors and made Volga Infotech our primary business partner. Volga Infotech brings immense value to our teams by providing us with highly skilled and dedicated software professionals, a great working environment, and excellent customer service. I would highly recommend Volga Infotech to businesses that need offshore development. ”

Ashish Agarwal

Vice President, Neudesic LLC (California, USA)

“ We had a somewhat complicated requirement and needed an IT Partner who provided us with an end-to-end solution for all our IT needs. It seemed like a mammoth task, but we setup a team at Volga Infotech, and Wow! it was SO SIMPLE. I'm blown away. You guys are genuinely great. Thanks for being so awesome. High fives! ”

TESTIMONIALS

Ali Kamarei

Founder, Tastem8 LLC (California, USA)

“ TasteM8 is a unique platform that brings together local restaurants, charities, and organizations. We decided to work with Volga Infotech because with the ease at which Jayesh understood our requirements and translated that into a Scope Document, was followed up by a highly professional Tech team with complete know-how on the project requirement and well-identified Road Map. Its been a pleasure working with Volga Infotech ”

Kaveh Mahjoob

Co-Founder, Infomagnus LLC (California, USA)

“ Volga Infotech has worked with Infomagnus for over a year now. I have always been able to count on Volga Infotech to provide me with the appropriate level of professional development for the proper level of experience and the right price. No matter what kind of experience level or problems that we ran into, we could always count on them to fill the types of experience gaps that we needed. I would consider Volga Infotech CEO Jayesh Bajaj a great friend and I would highly recommend working with him in many different ways. I would be happy to be called and spoken to about my experience with Jayesh Bajaj and all of the professionals that he provided me with over the years. ”

Delara Lalwani

Founder, Spenta Pte. Ltd (Singapore)

“ Hi, I am Delara Lalwani, and this comment from my client perfectly defines how good Volga Infotech is "I normally dislike beauty apps because they are quite useless and very tacky looking. Beauty Button is not like every other beauty app. It's super useful and beautifully designed – I'm on it twice a day, every day! - Payal V" ”

A Tool to build an analytics platform by leveraging the AWS ecosystem

The Tool is first-in-the-world software that works with cloud data repositories like Amazon S3 to build the most efficient environments for analytics ever. It loads data sets from varied sources like SAP, Oracle, Salesforce and SQL Server, flat files and other sources into the cloud repository and merges, prepares and verifies them for completeness. The data can now be accessed easily for analytics and other applications like ML, AI etc.

Clinical Development

We Make It Happen

We are MDs, PhDs, statisticians, and acronym lovers passionately focused on patients. We design, implement, manage, interpret and oversee the studies of our drug candidates to generate evidence of safety and efficacy for submission to regulatory authorities. Give us a challenge to address unmet medical needs and we're on it.
